

## Image collections

There are ten different image collections to choose from. On the following pages you can see examples of the images in each collection. There are 13 images in each collection, they will all be in the same style as the ones shown.

All you need to do is choose which collection you want and we'll upload the images for you. Of course, as with everything to do with your MyMarketing site, the image collections are flexible. So, once your site is live you can easily change from one collection to another. Or, of course, you can choose to add images of your own instead.

### Abstract collection
